

ANIL KUMAR

SENIOR ANDROID & FLUTTER DEVELOPER

Chandigarh, India | anilani786@gmail.com | +91-9803615445 | [LinkedIn](#) | [GitHub](#)

PROFILE SUMMARY

Senior Android Developer with 6+ years of experience designing, building, and scaling production Android applications with 100K+ downloads and 10K+ active installs, including 3+ years in product-based companies. Specializes in Kotlin, Jetpack Compose, and Clean/MVVM architecture, with a track record of improving app performance and stability on low-end devices, and shipping AI-integrated features using the Gemini API. Also has hands-on experience with Flutter/Dart, applying Clean Architecture and Riverpod 3, along with Kotlin Multiplatform (KMP) and Compose Multiplatform (CMP) for cross-platform development. Experience delivering products across ed-tech, payments, and content-streaming domains.

TECHNICAL SKILLS

Languages: Kotlin, Dart, Java

Core Android: Android SDK

UI & Frontend: Jetpack Compose, XML Layouts, Material Design, Coil

Architecture: Clean Architecture, MVVM, MVP, MVI, SOLID Principles, Design Patterns

Cross-Platform: Flutter, Kotlin Multiplatform (KMP), Compose Multiplatform (CMP)

Jetpack Components: ViewModel, LiveData, Navigation Component, Room, WorkManager, Paging 3

State Management & DI (Flutter): Riverpod 3

Dependency Injection (Android): Hilt, Dagger, Koin

Local Storage: Drift, SQLite, Realm, SQLDelight

Networking: Dio, Retrofit.dart, Retrofit 2, REST APIs, WebSockets

Async Programming: Future, Stream, Kotlin Coroutines, Flow, RxJava

Navigation: Navigation Component

Media & Streaming: ExoPlayer, Custom YouTube Player Integration

Cloud & Backend: Firebase (Auth, FCM, Analytics, Crashlytics, Firestore)

AI Integration: Google Gemini API, On-Device AI

IDEs & Dev Tools: Android Studio, VS Code, Cursor AI, Google Antigravity

DevOps & Tools: Git, GitHub, GitLab, GitHub Actions (CI/CD)

PROFESSIONAL EXPERIENCE

Senior Android Developer — *Melvano Education Pvt Ltd*

Nov 2022 – May 2026

- AI-powered learning platform: built and led development and maintenance of Android apps used by thousands of competitive-exam (JEE/NEET) students.
- Scaled to 100K+ downloads and 10K+ active installs on Google Play through continuous feature development and performance tuning.
- Built 3 Android apps from scratch and maintained 2 production apps, incorporating offline-first design for uninterrupted access and improving performance and stability across releases.
- Architected scalable features with Kotlin and MVVM/MVP, integrating Jetpack components, REST APIs, and Firebase while following SOLID principles for modular, maintainable code.
- Cut app load time by 20–30% across low-end devices and multiple Android versions, directly improving user retention and responsiveness.
- Partnered cross-functionally with backend engineers, UI/UX designers, and product managers to ship features aligned with business goals.
- Awarded Employee of the Quarter twice for technical excellence and impact on product development.

Android Developer (Training + Full-Time) — *Apptunix*

Jan 2019 – Aug 2022

- Completed a 6-month intensive Android development training program, then transitioned into full-time development across multiple client projects.
- Built production Android apps using Kotlin, MVVM, Jetpack components, Retrofit, and Firebase for a range of client requirements.
- Implemented key integrations including Google Maps, push notifications, and third-party SDKs.
- Owned Play Store deployment, app signing, and post-release maintenance to ensure stable releases.

PROJECTS

Melvano: The Topper's Secret ([Play Store](#))

- Contributed to an AI-powered learning platform for JEE and NEET exam preparation.
- Integrated a customized YouTube video player to improve the video-learning experience.
- Revamped app theme and UI, improved performance, and optimized Google Ads monetization while maintaining MVP architecture.

Skillbary: Become Job-Ready ([Play Store](#))

- Built a course-based learning platform using Kotlin, MVVM, and Two-Way Data Binding with Firebase services.
- Integrated Razorpay payment gateway for secure in-app course transactions.
- Added custom video playback via YouTube player libraries to support video-based learning.
- Adopted an offline-first approach with local caching to keep course content accessible with limited connectivity.

Tralendr — Custom Trip Planner ([Play Store](#))

- Built a travel-planning app generating personalized trip plans based on duration, group type, and destination preferences.
- Used Kotlin, MVVM, Firebase, Hilt, Navigation Component, and REST APIs for scalable, real-time data handling.

Trendz — Fast & Fresh News App ([Play Store](#))

- Built a real-time news app delivering trending, personalized content recommendations.
- Implemented topic-based feeds, bookmarking, and social sharing to boost user engagement.
- Built using Kotlin, MVVM, Firebase, Hilt, Navigation Component, and REST APIs.

Movie Explorer — Compose Multiplatform Demo ([GitHub](#))

- Built a cross-platform movie & TV discovery app running on Android, iOS, Desktop, and Web from a single codebase, to demonstrate production-ready Compose Multiplatform architecture.
- Implemented MVI + Clean Architecture with Koin for dependency injection, Ktor Client for networking, and Coroutines/Flow/StateFlow for state management.
- Delivered movie/TV browsing with search & pagination, cast & crew details, ratings, trailers, and a full-screen image gallery in a responsive Material 3 UI.

EDUCATION

GNIIT (Software Engineering) — NIIT, Chandigarh | 2016 – 2018

Bachelor of Arts (B.A.) — Indira Gandhi National Open University | 2016 – 2018

LANGUAGES

English, Hindi
